

ADUET DABRAL

Data Engineer | AWS | Cloud Data Pipelines | ETL/ELT | SQL

dabral.aduet@gmail.com | Dehradun, India | +91-9058601254 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Engineer with strong SQL and production database experience gained through supporting RDS and Aurora workloads on AWS, specializing in database performance analysis and troubleshooting. Leveraging hands-on end-to-end data engineering projects to build scalable ETL/ELT pipelines, cloud data warehouses, and analytics-ready datasets using Python, PySpark, and modern cloud platforms.

TECH SKILLS

Programming: Python, SQL, PySpark

Data Engineering: ETL/ELT, Apache Spark, Apache Kafka, Databricks, Apache Airflow, Mage AI, Data Warehousing, Data Modeling

Cloud & Data Platforms: AWS (Glue, Athena, S3, Lambda, RDS, IAM, EC2), Azure (ADF, ADLS), Google Cloud (BigQuery, Cloud Storage)

Databases: MySQL, SQL Server

Data Processing: Pandas, NumPy

Tools & APIs: Git, Docker, REST APIs, FastAPI

PROFESSIONAL WORK EXPERIENCE

Cloud Support Associate (Databases)

Jun 2024 – Aug 2025

Amazon Web Services (AWS)

Gurugram, India

- Resolved 150+ production Amazon RDS and Aurora support cases by diagnosing database performance bottlenecks, recommending database and workload optimizations that improved workload performance by approximately 30% in performance-related engagements.
- Maintained a 4.95/5 customer satisfaction rating by owning database support cases end-to-end, troubleshooting through email, voice, and screen-sharing sessions, and delivering remediation strategies across General, Business and Enterprise support plans.
- Partnered with internal engineering teams to resolve complex database issues, communicated backend service updates, met SLA commitments, and authored three internal troubleshooting playbooks that standardized investigation steps for SQL Server, Performance Insights, and Enhanced Monitoring.

Statutory Audit Analyst

Jan 2023 – Jun 2023

Deloitte Haskins & Sells LLP

Gurugram, India

- Automated audit validation workflows using SQL, Spark (Scala), Advanced Excel, and statistical sampling techniques, reducing audit turnaround time by approximately 20% across client engagements.
- Validated and analyzed financial datasets ranging from a few thousand to over 30 million records, identifying anomalies, compliance issues, and data inconsistencies through automated parameter checks while preparing executive audit reports that streamlined reconciliation and downstream assurance activities.

PROJECTS

[Healthcare Revenue Cycle Data Platform](#) | Azure Data Factory, Databricks, Delta Lake, ADLS Gen2, PySpark, SQL

- Implemented a metadata-driven Azure Lakehouse platform using Medallion architecture to consolidate healthcare data from multiple operational sources into a centralized Delta Lake, enabling consistent enterprise reporting and downstream analytics.
- Built reusable Azure Data Factory and PySpark pipelines supporting configurable full/incremental loading, SCD Type 2, Common Data Model (CDM) standardization, and dimensional models to deliver reliable, scalable healthcare revenue analytics.

[Real-Time Stock Market Data Pipeline](#) | Apache Kafka, AWS (EC2, S3, Glue, Athena), Python

- Designed a dimensional data model and interactive Power BI dashboards that transformed raw supply chain data into centralized operational reports for monitoring supply chain performance and business KPIs.
- Applied Power Query transformations and DAX measures to track key supply chain KPIs - including revenue, profit margin, inventory turnover, lead time, shipment performance, and supplier efficiency – to support operational analysis.

[YouTube Data Lake & Analytics Pipeline](#) | AWS (S3, Lambda, Glue, Athena), PySpark, SQL

- Engineered a serverless data lake on AWS following Medallion Architecture to automate the ingestion and transformation of 40K+ daily YouTube trending records, leveraging AWS Lambda for JSON processing and AWS Glue for scalable ETL.
- Optimized the data lake using Hive-style partitioning and Parquet conversion, reducing storage costs by 50% while enabling sub-second analytical queries through partition pruning in Amazon Athena.

EDUCATION

Bachelor of Technology in Computer Science Engineering | DIT University, Dehradun

CGPA: 9.37/10

Specialization: Artificial Intelligence and Data Science (IBM Partnership)

CERTIFICATIONS

- AWS Certified Solutions Architect - Associate | AWS
- AWS Certified Machine Learning Engineer - Associate | AWS
- Data Science and AI Analyst | IBM
