

ADUET DABRAL

Data Analyst | Business Intelligence | SQL | Cloud Data Pipelines | ETL/ELT
dabral.aduet@gmail.com | Dehradun, India | +91-9058601254 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with 1+ years AWS production database support and 6+ months of shipped analytics projects. Expert in translating business problems into metrics driven dashboards, self-service analytics platforms, and data pipelines. Proven track record delivering measurable business outcomes: \$50K in avoided downtime, 30% performance improvements, and 92% customer satisfaction. Skilled in stakeholder management, ad-hoc reporting, and building dashboards across AWS, Azure, and modern data stacks.

WORK EXPERIENCE

Cloud Support Associate (Databases)

Jun 2024 – Aug 2025

Amazon Web Services (AWS)

Gurugram, India

- Resolved 400+ production Amazon RDS/Aurora support cases (92% CSAT; 4.92/5.0 quality score; 68% FCR; 97% SLA compliance), diagnosing database performance bottlenecks and recommending optimizations that improved workload performance by ~30% in performance-focused engagements and saved customers ~\$50k in avoided downtime.
- Authored 6 standardized troubleshooting playbooks that reduced average case resolution time by ~15% and established reusable investigation frameworks; mentored 5+ newly onboarded engineers through structured case reviews and peer-coaching sessions.
- Partnered with internal engineering teams to resolve complex database issues, communicated backend service updates, and owned customer remediation strategies, managed stakeholder escalations under SLA pressure.

Statutory Audit Analyst

Jan 2023 – Jun 2023

Deloitte Haskins & Sells LLP

Gurugram, India

- Validated and analyzed financial datasets ranging from thousands to over 30 million records, identifying anomalies, compliance issues, and data inconsistencies through automated parameter checks and statistical sampling, delivered findings in executive audit reports that streamlined reconciliation and downstream assurance activities.
- Automated audit validation workflows using SQL, Spark, Advanced Excel, and statistical sampling techniques, reducing audit turnaround time by approximately 20% across client engagements and improving data quality validation efficiency.

PROFESSIONAL PROJECTS

[Healthcare Revenue Cycle Data Platform](#) | Azure Data Factory, Databricks, Delta Lake, ADLS Gen2, PySpark, SQL

- Designed metadata-driven Medallion architecture that consolidated 5+ disconnected healthcare data sources into centralized Delta Lakehouse with unified schemas, enabling self-service analytics dashboards that replaced manual cross-system lookups.
- Built star schema with fact/dimension tables optimized for BI workloads; automated incremental loading using watermark detection and SCD Type 2 historical tracking, cutting compute costs by consolidating 5+ separate pipelines into 1 metadata-driven orchestration.

[Zomato AI Data Analytics Platform](#) | S3, Snowflake, dbt, Apache Airflow, Python, LLM integration

- Orchestrated end-to-end data + AI pipeline using Apache Airflow that combined traditional ETL with LLM-powered review enrichment to generate structured business insights; implemented Medallion framework with automated testing and data quality checks.
- Built AI analytics layer with 3 analytical patterns: (1) LLM enrichment transforming 50K+ unstructured reviews into structured signals; (2) RAG semantic search enabling chat interface over customer feedback via vector embeddings; (3) Text-to-SQL natural-language query interface with read-only guards for self-service analytics.

[Enterprise Credit Risk Assessment & MLOps Governance System](#) | Scikit-Learn, FastAPI, Docker, Prometheus, Grafana, MLflow, SHAP

- Built automated credit screening system that rejected 84% of applicants likely to default, preventing millions in bad loans while approving 85% of good borrowers automatically, balancing risk protection with business revenue from lending.
- Ensured loan decisions were fair across all borrower groups by achieving 94% demographic parity in model predictions: automated compliance documentation for rejected applicants via SHAP explainability and MLflow monitoring.

TECHNICAL SKILLS

Programming & Analytics: Python (NumPy, Pandas, scikit-learn), SQL, PySpark, Advanced Excel

Data Engineering: ETL/ELT, Apache Spark, Databricks, Data Warehousing, Data Modeling, Increment Loading, Airflow

Machine Learning & AI: Data Cleansing, Visualization, EDA, Feature Engineering, Sentiment Analysis, Statistical Modeling, A/B Testing

Cloud & Data Platforms: AWS (Glue, Athena, S3, Lambda, RDS, IAM, EC2), Azure (ADF, ADLS), Google Cloud (BigQuery, Cloud Storage)

DevOps & Tools: Git, Docker, Power BI, Google Data Studio, REST APIs, FastAPI, CI/CD (GitHub Actions), Pydantic, IBM SPSS, n8n

Certifications: [AWS Certified Solutions Architect - Associate](#) , [AWS Certified Machine Learning Engineer - Associate](#)

EDUCATION

Bachelor of Technology in Computer Science Engineering | DIT University, Dehradun

CGPA: 9.37/10

Specialization: Artificial Intelligence and Data Science (IBM Partnership)

Relevant Coursework - Linux, DBMS, Operating Systems, Computer Networks, Cloud Computing, AI and ML, Data Science
